Every exterior, interior and installation is a bit different and requires different lighting solutions. So for the most unusual projects, standard indoor and outdoor lights and accessories might not be the best answer. That is why, instead of adjusting, combining different indoor and outdoor lights and accessories to build your own system you can order LUMO customized LED lights for your space.

Lumo will check your lighting project and will try to adjust the technical aspect according to your specification as well.

So please feel free to specify your indoor and outdoor lighting expectations towards customized LED lights. Then provide the technical details of your project and LUMO will come up as soon as possible with a solution.
LUMO provides good solutions for your stairs as LED stair lights not only to reduce the chances of accidents but can even add value to the home.

Since LED Strip lights do not use very much energy and so do not cause a dramatic increase in the electricity bill, even if they are left on all night. LED Strip lights come in various colors, enabling a homeowner to pick the color and style that best suits his or her home.

Decorating and enhancing the look and feel doesn’t have to be a huge financial or time consuming endeavor. Just by changing a few colors, experimenting with new patterns, can provide a great new look.
About the LUMO Aluminum Profiles:

LUMO offers a comprehensive choice of LED Strip Light Aluminum Profiles (also called LED tape profiles, tape channels, LED Strip Light extrusions and tape tracks). Aluminum profiles are premium Extrusions – all designed to accommodate and enclose LUMO LED strip lights, creating a striking LED light-bar.

Here in LUMO we offer a variety of different LED Strip Light Profiles surface mounted, recessed, and corner fitted. They are also available with frosted (diffused), Milky or optic covers. To find out more about our Aluminum Profiles please check out our website: www.lumo.ae.

Why should we use Aluminum Profiles?

Generally aluminum profiles can enable you to fit LED Strip Lights in locations where installation would not be possible without using them. The other reason of using Aluminum Profiles is that, they can be butted together smoothly; giving a continuous effect.

Furthermore they will provide additional protection from touch and moisture for your LED strip lights and offer a professional finish, ideal if the LED Strip Light is on view.
There are many advantages of LED lighting. These energy efficient lights produce less heat than many other devices. By embedding LED lights and wiring into LED extrusions, the lighting can be used in unique ways to improve safety, visual appeal and improve marketing approaches.

When planning the new design or changes, toilets, sinks, countertops, and flooring are all important considerations. No matter what changes you make, there is one thing that you can do that take the look and feel, the whole experience, to a new level: incorporate LED lighting!
Not only LED suspended lights are brighter and clearer than other forms of lighting, they are also more energy efficient and cost efficient in public areas.

When it comes to home interiors, the kitchen is one area that often takes center stage. So much of today’s lifestyle takes place in the kitchen, so it is no wonder that kitchen is one of the most important rooms in the house when it comes to resale.

Kitchens that are functional, safe, efficient, modern, and offer plenty of room for storage and entertaining, are extremely desirable for home buyers.
