

OUTDOOR CATTAIL LIGHT WITH SPIKE

Description

Outdoor lighting inspired by a standard beige ear of rice slowly swinging in the wind. This product 3 mm wide stem is made of carbon fibre and a LED covered by a standard beige perforated tube is attached to its end, which creates light in dots reminding us of paddy rice. Human-detection sensors are embedded in the base and when a person comes by the light, it begins to sway in that direction. Dozens of lights would create a landscape that responds to and follows people, which will make an attractive entrance or corridor. By extracting the characteristics from an ear of rice and representing them with minimal elements, we approached a product that possesses novelty and nature-oriented familiarity together.

Correlated Color Temperature (CCT)

Beam Angle

Diffused

Color Finish

Standard Beige

Electrical Features

Wattage	2W
Light Source	LED
Output Lumen	110lm
Input Voltage	24V DC
Working Temp.	-30°C ~ 60°C
Color Rendering Index	>80
LED Life Span	50,000Hrs
Control	ON/OFF

Mechanical Features

Installation	Floor ground installation
Stem Material	Stainless steel
Light Material	Brass
Ingress Protection	IP65
Dimension	H1300mm (1400-1500mm Available)

Project Name: Serenity Show Villa - Tilal Al Ghaf, Dubai, UAE
